

GUIDE TO ISAS 2012/13

THIS IS OUR GUIDE TO INDIVIDUAL SAVINGS ACCOUNTS AND HOW TO MAKE THE MOST OF THE ANNUAL TAX YEAR ALLOWANCE. IF YOU WOULD LIKE TO DISCUSS ANY OF THE INFORMATION PROVIDED IN MORE DETAIL, PLEASE CONTACT US.

“AN ISA SITS OVER YOUR CHOICE OF INVESTMENTS TO SHELTER THEM FROM FURTHER TAX.”

● WHAT IS AN ISA?

'ISA' stands for Individual Savings Account, a tax-efficient wrapper offered under Government legislation as a way of encouraging you to save. An ISA sits over your choice of a number of different investments to shelter them from further tax on any income or gains earned.

There are just two types of ISA – the Cash ISA and the Stocks and Shares ISA – and the combined allowance for both in 2012/13 is £11,280.

Within this, the limit for Cash ISAs - or for the cash element within a Stocks and Shares ISA - is £5,640. However, there is flexibility over how these limits can be used – you can, for example, put the maximum £5,640 in a cash account and £5,640 in a stocks and shares account. Alternatively, though, if you place just £2,000 in cash, you can use the entire remaining balance – £9,280 in this case - to invest in stocks and shares. If you wish, you may put the full £11,280 into a Stocks and Shares ISA.

In addition, you can transfer existing Cash ISA holdings to a Stocks and Shares ISA without impacting on your current tax year allowance. So, if you have £10,000 already sitting in existing cash ISA plans then this amount can be moved to a Stocks and Shares ISA, yet leave your entire current tax year allowance still available for new investment.

● WHAT SHOULD I LOOK FOR IN A CASH ISA?

Cash ISAs are simply cash accounts that sit within an Isa wrapper and therefore have certain tax advantages. As with a normal bank account, the underlying account will pay a certain level of interest. Therefore, in shopping around for the best Cash Isas, investors should check to ensure the rates on offer are competitive.

However, a high rate is not the only reason for selecting a Cash ISA as the highest rate today may not be the best rate over the longer term. There may be Cash ISA providers offering slightly lower but consistently competitive rate levels, which may suit those who do not want to keep shifting provider.

Furthermore, some providers tie money up for a period of time. These accounts may pay higher rates but, in return, savers may have to wait up to 90 days to make a withdrawal.

In essence, even these seemingly simple products need some research. Make sure you make the right choice before you commit yourself.

A RANGE OF INVESTMENTS TO CHOOSE FROM

OF YOUR £11,280 2012/13 ALLOWANCE, YOU CAN CHOOSE TO INVEST UP TO £5,640 IN CASH AND THE REST OF THE BALANCE IN STOCKS AND SHARES. ALTERNATIVELY, HOWEVER, IF YOU DO NOT NEED A CASH ISA, OR YOU BELIEVE YOUR TAX BENEFITS ARE BETTER USED ELSEWHERE, YOU CAN AVOID THE CASH ISA COMPLETELY AND JUST INVEST THE FULL AMOUNT INTO STOCKS AND SHARES.

● SELF-SELECT ISAS

Self-select ISAs allow you to choose your own investments and will generally offer a choice of individual shares, individual bonds or collective investment schemes, such as OEICs, unit trusts, investment trusts or exchange-traded funds. The choice will ultimately depend on your reasons for investing and your tolerance for risk. If you are seeking capital growth and are comfortable with the possibility of losing some or all of your capital, investing in single shares is a high-risk approach that can pay off. However, collective investments are often a more appropriate choice, particularly if your ISA investment constitutes a significant proportion of your overall savings.

● COLLECTIVE INVESTMENTS

By investing in a collective investment, you are accessing not just one or two but many different companies or holdings. Known as diversification, this approach is designed so that should one holding lose money it will not be a significant part of your portfolio.

Collective schemes offer access to a whole range of different investments. Some will offer a 'one-stop shop' investment into a number of different asset classes, such as equities, bonds and property. Others will focus on just one area, which could be anything from large UK equities right through to Japanese bonds. To make the choice easier for you, most unit trust and OEIC funds are sorted into sectors by the Investment Management Association (IMA) so that you can compare funds with similar goals.

If you want a lower-volatility fund or you have a relatively short timeframe, it may be best to pick a collective fund that offers a lower exposure to equities. For example, a fund in the 'Mixed Investment 0-35% Shares'

sector might be appropriate. Alternatively, if you are looking to maximise long-term growth, and are prepared for a 100% exposure to equities, the UK All Companies sector is a good place to start. If you wish to be more adventurous still, there are equity fund sectors for every region in the world. Finally, if you are after an income, bond or equity income sectors are most appropriate.

● LEADING IMA SECTORS

UK funds	Overseas funds
UK All Companies	Global
UK Equity Income	Global Bond
UK Equity & Bond Income	Europe excluding UK
£ Corporate Bond	Europe including UK
£ Strategic Bond	European Smaller Cos
£ High Yield	North American
UK Gilt	North American Sm Cos
UK Index Linked Gilts	Japan
UK Smaller Companies	Asia Pacific ex Japan
	Asia Pacific inc Japan
	Global Emerging Markets
Mixed investment	Other
Mixed Inv. 0-35% Shares	Money Market
Mixed Inv. 20-60% Shares	Protected
Mixed Inv. 40-85% Shares	Specialist
Flexible Investment	Technology & Telecoms

● CHARGES

When making your choice, you should also be aware of the associated charges. There may be a charge for the Isa wrapper (though this is increasingly rare), but there will be upfront and ongoing charges for the underlying investment. This fee will vary according to the complexity of the product and the company managing it. As such, a straightforward index-tracking fund that mirrors the

“YOUR INVESTMENT CHOICE WILL ULTIMATELY DEPEND ON YOUR REASONS FOR INVESTING AND YOUR TOLERANCE FOR RISK.”

performance of an index such as the FTSE 100 will be cheaper than, say, a Japanese Smaller Companies fund, where a fund manager selects the stocks, often through in-depth proprietary research, and may have a team of investment professionals to support them.

Your tax position could also affect your investment choice but such a consideration is likely to require specific professional guidance. If you are interested in discussing your tax position further, please contact us. In the meantime, here is a summary of some of the issues to bear in mind.

● SOME TAX CONSIDERATIONS

While ISAs are well known for being 'tax-efficient', your choice of investments can make a big difference to how beneficial they prove. All the income and growth you receive from your ISA is tax-free in your hand, but how each asset class is treated while it remains invested is different – and this can be confusing.

Cash ISAs, for instance, are entirely free of income tax. Therefore, if you earn £1 in interest, you receive the whole lot. On a normal bank account, basic rate taxpayers currently pay tax of 20p on that £1 and higher rate taxpayers would be liable for a further 20p. As such, you receive more income from this account than you would do outside an ISA.

Similarly to cash, the interest on corporate bonds is also tax-free. However, unlike Cash ISAs, the capital value can fluctuate, and there is therefore the possibility of a tax-free capital gain as well as tax-free income. Of course, on the flipside, that also means there is the chance of a capital loss if markets move against the investment – and also a risk to your income if a company defaults. As a result, corporate bonds generally pay a higher income than deposits as a way of compensating investors for taking on this additional risk.

The tax benefits on shares are a little different. Under normal circumstances, basic rate taxpayers currently suffer a 10% tax on dividend income. This 10% tax payment is not refundable within an ISA, regardless of the tax position of the investor. You could argue, therefore, that a stocks and shares ISA offers little additional benefit to a normal basic rate taxpayer – although there are still considerable advantages for a higher rate tax payer, who does not have to pay any additional income tax on dividend receipts.

However, based on their historical performance, equities have offered greater long-term growth potential than any other asset class and this is particularly true for areas such as emerging markets, which carry commensurately higher risks. For this type of investment, the benefit of the ISA wrapper is mainly derived from the fact that investors pay no capital gains tax.

Equities always need to be considered as a long-term investment as there is a possibility you may not receive back your original investment – particularly in the first few years. Before making any investment decision you should weigh up the tax advantages against the potential risks and likely returns.

USE IT OR LOSE IT

One thing is not up for debate: you only receive one ISA allowance every tax year.

You cannot carry your allowance over to the next tax year and therefore, if you do not do something about it, you will lose it.

Your annual allowance can be used at any time during the tax year. The deadline of 5 April helps to concentrate the mind and there is generally an increase in ISA investments at this time of year. However, you do not have to wait. You can use your allowance at any time – and many would suggest that the earlier the better, particularly with cash ISAs where the earlier you open one the more interest you earn.

For stocks and shares ISAs, some feel there is an argument for trying to 'time' an investment in and out of the market, buying in when the assets are cheap in order to make more when they recover later. However, few have proved themselves successful at this type of market prediction.

An alternative approach is to 'drip-feed' your allowance in on a monthly basis, so that you buy in at different prices as markets fluctuate. Ultimately this can help to smooth the return on your investment.

Regardless of how or where you decide to invest your money, you must do so before 5 April. At the end of the tax year, your allowance is gone. So start your research now and make sure you do not miss out.

YOUR QUESTIONS ANSWERED

When were ISAs introduced?

ISAs were introduced in 1999 and have grown in popularity ever since. In the 2011/12 tax year almost £3bn was invested, bringing the overall total close to £50bn.

Who can open an ISA?

You must be UK resident for tax purposes and over the age of 16 to open a Cash ISA, or over 18 to open a Stocks and Shares ISA. If you open an ISA and then move abroad, you cannot add any new money to that ISA. However, you are able to keep the existing investment open and continue to enjoy the tax benefits on that.

Can I change my mind if my investment provider underperforms?

Yes – you are able to transfer your ISA proceeds to a different manager at any time. This is particularly easy if you have a self-select ISA, where you can change investment managers without switching ISA providers. However, you should always bear in mind – particularly with bonds, property or equity investments – that this is a long-term decision, moving can add costs and it is therefore best not to be overly swayed by short-term fluctuations in markets.

How would I transfer an ISA to another provider?

In order to transfer the money and retain the tax benefits, you must complete a 'Transfer request' with your new provider, who will then contact the existing provider on your behalf and arrange to take charge of the proceeds for you.

You must not close one ISA and then reinvest the proceeds in another as this is deemed to be a withdrawal. Once you withdraw, you lose all tax benefits on the money and cannot reinvest, except where the amount falls below your current tax year's unused allowance.

How do I monitor performance?

Your ISA provider will normally send you statements every six months to let you know how much your investment is worth and you can therefore compare this to previous statements to see how your investment is progressing.

In between times, if you are invested in a collective investment or direct shares, the prices of these are available on the internet or in certain newspapers. If you are invested in a cash deposit account, monitor mail from the bank telling you of changes to interest rates – and compare this with tables in Sunday newspapers and on internet finance sites to make sure you are receiving the most suitable deal.

When can I withdraw my money?

Some accounts may have notice periods but you can give instructions to withdraw at any time. The provider will then divest your money and return the proceeds to you. You do not need to withdraw all of your money – you can just take a proportion of your investment and leave the rest invested. Do be aware, however, that some providers have minimum investment levels you have to meet.

What happens if I open two ISA accounts in the same tax year by mistake?

If this happens, the second ISA will become fully taxable. You are not able to nominate the second ISA as the preferred account for this tax year – so make sure you are happy with the provider you have chosen before you make your move.

Do note that, if you pay into an ISA via regular savings, the first payment on or after 6 April automatically opens an account for the new tax year. If you wish to stop payments into an existing account and move to a new one, make sure you provide instructions to the provider and your bank well in advance or you will either be stuck with it for another year or have to go through the lengthy 'transfer' process to put things right.
